

SUMMARY

I'm most comfortable where product complexity meets real users.

Front-end and mobile engineer with 13 years of experience building React and React Native applications used by millions of users. Strong focus on performance, accessibility, and shipping reliable cross-platform UI that holds up at scale. Comfortable owning complex systems end-to-end and working closely with product, design and backend teams.

AI EXPERIENCE

- Daily user of AI-assisted development tools for coding, debugging, documentation and repo-wide analysis
- Support engineers in using AI confidently and safely
- Strong interest in prompt engineering and improving developer workflows
- Exploring how AI can support front-end applications and workflow automation

SKILLS

- React & React Native (Production Applications)
- TypeScript & Modern JavaScript (ES6+)
- Cross-Platform Mobile Architecture & Scalable UI Systems
- State Management (Redux, Zustand, TanStack Query)
- Mobile Performance Optimisation & Reliability
- App Store & Google Play Release Management
- API Integration & Back-End Collaboration
- Testing & Quality (Jest, React Testing Library, CI/CD)
- Accessibility (WCAG) & Web/Mobile Best Practices
- AI-Assisted Development & Developer Tooling
- Technical Leadership, Mentoring & Code Reviews

Tania Papazafeiropoulou

Senior Front-End & Mobile Engineer & Tech Lead

hello@tany4.com United Kingdom / Greece tany4.com

KEY STRENGTHS

- Shipping cross-platform systems
- Front-end architecture & maintainability
- Performance & accessibility
- Cross-functional collaboration

EXPERIENCE

05/2026 - Present

Senior Mobile Engineer (Contract) - The Ready Collective

Three-month contract to design and launch the R1 platform's cross-platform mobile app. Working alongside a former Olio colleague - the same founding-team setup that shipped Olio's consumer React Native app from scratch within 3 months.

- Building the R1 consumer React Native app for iOS and Android from the ground up, targeting a production launch within a 3-month engagement.
- Contributing to the Next.js web app and Node.js/Express backend.

08/2023 - 03/2026

Front-End Tech Lead - Olio

A growing B2C/B2B scale-up focused on food redistribution. Joined when the company had <20 employees and 3 developers; contributed across its growth to 100+ employees and millions of users.

- Owned front-end direction across partner and volunteer platforms, balancing product needs, UX quality and maintainability.
- Led re-architecture of a 10-year-old scheduling system. Incremental migration with feature flags and rollback, zero user disruption, eliminated long-standing bugs.
- Led i18n initiative across the partner platform: Luxon integration for locale-aware date/time handling, added Chinese language support.
- Improved performance, accessibility and reliability through refactoring, monitoring and reducing technical debt.
- Worked closely with product, design, operations and backend to turn complex workflows into clear, maintainable UI solutions.
- Prototyped new ideas during internal hackathons (partner platform, AI-assisted appointment planner) to validate concepts and inform next steps.
- Mentored engineers through pairing and code reviews while remaining a strong IC, writing production code daily and unblocking complex technical problems.

09/2018 - 08/2023

Senior Front-End Developer - Olio

- Promoted from Mid-Level to Senior within 1 year based on performance.
- Key contributor to building and stabilising Olio's React Native consumer app from scratch. Helped ship the initial version within 3 months as part of a small team.

Completed Leadership Training: Human Leadership

July 2024

HOBBIES AND INTERESTS

I enjoy dancing, running, swimming, watching movies and spending time with my dog, Mario.

- Managed regular App Store and Google Play release cycles, coordinating with product, QA and backend teams.
- Optimised map marker and cluster rendering so it only runs when data changes, improving performance on list and map views.
- Led migration of the Volunteers platform from Rails views to a modern React SPA. Established routing, navigation, and component patterns from scratch.
- Extended the Volunteers platform beyond the initial migration: designed and built new flows to support charity volunteers alongside Olio volunteers.

08/2017 - 08/2018

Front-End & App Developer - Esquared Technologies

- Delivered features on an Angular2 app, working closely with founders and designers.

03/2016 - 08/2017

Web Developer - Cult Beauty

- Built UI features for a high-traffic e-commerce site. Worked on checkout and payment flows, integrating third-party payment methods including Klarna and PayPal. Contributed to both frontend and backend PHP code.

07/2014 - 02/2016

Web Developer - IDG UK

- Developed editorial and publishing tools for websites including PC Advisor, Macworld, ComputerWorld, Digital Arts Online and TechWorld.

01/2013 - 07/2014

Junior Software Developer - Kantar Worldpanel

- Built internal data tools and reporting automations.
